SUMMARY

Cybersecurity Engineer with 2+ years of hands-on experience in security operations, detection engineering, and penetration testing across enterprise environments. Proven track record deploying and operating EDR and SIEM platforms at scale, building and tuning detection rules to reduce false positives, and conducting web/network penetration testing aligned to OWASP Top 10 and MITRE ATT&CK. Experienced with cloud security posture management (CTEM/CSPM), malware analysis, and incident triage. Pursuing OSCP; holds eJPT, CNSP, and PT1 certifications. Currently expanding knowledge in AWS security services and OWASP LLM Top 10.

EXPERIENCE

Cybersecurity Engineer

Betopia Limited

Oct 2025 – Present

Dhaka, Bangladesh

- Deployed and operationalized **Kaspersky EDR Expert** across **815 endpoints spanning 16 strategic business units** - the organization's first centralized EDR implementation; authored endpoint security policies, exclusion rules, and response playbooks tailored to each SBU's risk profile.
- Operated enterprise **SIEM (Wazuh)**: developed and tuned **custom correlation rules**, performed alert triage, incident investigation, and escalation – improving detection accuracy and reducing false positive rates.
- Conducted **web and network penetration tests** aligned with **OWASP Top 10**, **PTES**, and **MITRE ATT&CK**; identified 15+ vulnerabilities per engagement; delivered **CVSS-scored remediation reports** with exploitation steps and actionable mitigation to development teams.
- Embedded **SAST (SonarQube)** and **DAST (Burp Suite)** into the application security review workflow; surfaced hard-coded secrets, insecure coding patterns, and OWASP Top 10 vulnerabilities in internal web and mobile applications.
- Managed **cloud security posture** via **AppAcuity CTEM/CSPM** – performed attack surface discovery, misconfiguration detection, and risk prioritization; produced adoption recommendations for security leadership.
- Conducted **phishing and malware threat analysis** across 16+ SBUs, triaging 100+ malicious indicators monthly using **sandbox analysis** (Any.run, Hybrid Analysis) and IOC enrichment; coordinated containment actions with IT teams.
- Performed **malware analysis and incident response** on compromised WordPress sites: file-system forensics to identify backdoors, webshells, and injected scripts; traced infection vectors and delivered root-cause analysis with hardening recommendations.
- Mapped detections and threat activity to **MITRE ATT&CK TTPs**; produced incident reports, detection rationale documentation, and runbooks to build organizational knowledge and support audit readiness.

Jr Executive – IT & Cybersecurity

Neuratech Ltd

2024

Dhaka, Bangladesh

- Managed **50+ user accounts** via Active Directory; enforced **IAM policies**, group policies, and password hardening – foundational identity and access management experience.
- Conducted **vulnerability assessments** and supported security reviews to identify and remediate misconfigurations across Windows Server and endpoint environments.
- Applied **system hardening** practices including service restriction, access control tightening, and firewall configuration to reduce overall attack surface.

CORE SKILLS & TOOLS

- **Detection Engineering & SIEM**: Wazuh, Detection Engineering, Correlation Rule Development, Detection Use Cases, Dashboard Development, Security Monitoring, Log Analysis, Alert Tuning, MITRE ATT&CK Mapping, Incident Investigation
- **EDR & Endpoint Security**: Kaspersky EDR Expert, SentinelOne (enterprise deployment, endpoint telemetry, detection tuning, policy management)
- **Incident Response & Threat Analysis**: Alert triage, incident investigation, post-incident documentation, malware analysis, file-system forensics, IOC Analysis, Phishing Investigation, Root Cause Analysis, sandbox analysis (Any.run, Hybrid Analysis)
- **Application Security**: OWASP Top 10, SAST (SonarQube), DAST (Burp Suite), web & network penetration testing, CVSS scoring, secrets management
- **Cloud Security & IAM**: AppAcuity CTEM/CSPM, cloud attack surface discovery, misconfiguration detection; Entra ID, Conditional Access, MFA, IAM policy review, Microsoft Defender; AWS security (GuardDuty, Inspector – documentation & self-study)
- **Penetration Testing Tools**: Kali Linux, Burp Suite, Metasploit, Nmap, SQLMap, Nessus, Nikto, Wireshark, Gobuster, Hydra
- **Frameworks & Standards**: MITRE ATT&CK, OWASP Top 10, PTES, NIST CSF, Zero Trust Principles, SOC 2 (familiarity)
- **System & Network Security**: Windows Server, Active Directory, Linux (Kali/Ubuntu/Parrot), Wireshark
- **Currently Exploring**: OWASP LLM Top 10 (active self-study into LLM-specific threat modeling and detection concepts)
- **Currently Exploring**: Cross-functional Collaboration, Technical Documentation, Security Reporting, Presentation of Security Findings, Stakeholder Communication

PROJECTS

- **Kaspersky EDR Expert – Enterprise Endpoint Deployment**: Scoped, planned, and executed full EDR deployment across 815 endpoints / 16 SBUs; authored security policies, exclusion rules, and response playbooks per SBU; established daily threat alert triage workflow and produced runbooks enabling independent IT management.
- **SAST & DAST – Internal Application Security Testing**: Integrated SonarQube SAST and Burp Suite DAST into the security review workflow; surfaced hard-coded secrets, vulnerable dependencies, and OWASP Top 10 vulnerabilities; delivered CVSS-scored findings with remediation guidance to development teams.
- **Microsoft 365 Security Hardening – Entra ID, Defender & IAM**: Designed and implemented Conditional Access policies, enforced MFA, and configured Microsoft Defender for Identity and Office 365 – directly reducing identity attack surface.

- **AppAcuity CTEM/CSPM – Cloud Security Posture POC:** Conducted structured POC evaluation of AppAcuity; assessed attack surface discovery, misconfiguration detection, and risk prioritization capabilities; delivered evaluation report with adoption recommendations to security leadership.
- **Malware Analysis & Remediation – WordPress Sites:** File-system forensics to identify backdoors, webshells, and injected scripts across multiple client sites; traced infection vectors; delivered root-cause analysis with post-remediation hardening controls.

CERTIFICATIONS & TRAINING

eJPT – eLearnSecurity Junior Penetration Tester	PT1 Path – Penetration Testing (INE)
CNSP – Certified Network Security Practitioner	NSE 3 – Fortinet Network Security Associate
ICCA – INE Certified Cloud Associate	CCNA 200-301 – Cisco Network Associate
Windows Server Administration – BASIS SEIP	OSCP – In Progress

EDUCATION

Computer Science and Engineering	2018 – 2023
Daffodil International University	Dhaka
